

HEATING
4.0.

CREATING COMFORT ADVANCED, EFFICIENT, CLEAN & RESPONSIBLE

Our mission is to provide the most advanced and efficient electric heating and domestic hot water solutions on the market. We want our customers to enjoy the warmth, quality and savings that our heating solutions offer.

COMMITTED TO THE FUTURE OF ELECTRIC HEATING 4.0

Digitalisation is having an increasing impact on industrial production lines. This is why Rointe are clearly committed to advanced, digital production and technologies of the so-called fourth industrial revolution.

We have two very clear objectives. One is the customer, offering a wider range of technologically-advanced products to meet the needs of the different profiles currently on the market. The other is the environment, so that through the application of industry 4.0 technologies, we can reduce our environmental impact by being more efficient in our production process and our working environment, along with manufacturing sustainable electric heating products that do not harm our fragile world.

The transformations are based on renewed protocols and constant investment in new technologies. We want to achieve an interconnected production network capable of responding to the challenges of 21st century manufacturing and distribution. Hence the fundamental role played by innovation in our company, which allows us to keep pushing forward and to position **Rointe as the leading company in the transition towards Industry 4.0.**

HELPING OUR FORESTS GROW

We want to contribute to a healthier climate and to restore our forests for a more sustainable future. So, we've teamed up with CO2 Revolution to aid the recovery of green spaces degraded by fires and deforestation. For every Rointe heating product registered online, we'll contribute funds to their campaign for planting trees. **The more Rointe products registered, the more trees can be planted** to help our planet regain its natural balance.

INFINITELY RECYCLABLE

The aluminium used to produce all Rointe radiators is 100% recycled for 2 reasons: it has the best thermal conductivity/cost ratio, but also because it is infinitely recyclable, which makes it very valuable from an environmental point of view.

It is estimated that 75% of all aluminium produced is still used today because its properties do not change during recycling. This process also uses only 5% of the total energy required to produce new aluminium.

WELCOME TO THE FUTURE OF HEATING TODAY

We are a trusted manufacturer of electric solutions for space and water heating, with millions of installations in properties throughout Europe. We provide technologically advanced, energy-efficient electric heating systems that create comfortable homes without excessive consumption or unnecessary costs.

With over 30 years of knowledge and experience, our success is guided by our commitment to quality and innovation:

- Innovative, intelligent and sustainable electric heating solutions
- Efficient, clean and accessible comfort
- 100% high quality European components
- Compliance with all regulations in safety, quality and health
- Maximum guarantees on every product
- Low maintenance products with low failure rates
- Continuous investment in research and development
- 360° service from a team of dedicated professionals

TRUSTED QUALITY

We're proud of our service and strive to exceed customer expectations. That's why we've been awarded the Feefo Gold Trusted Service for the second year running. It's an independent seal of excellence based on reviews from real customers.

Star rating:

4.7/5

Based on comments from real customers who have purchased Rointe products.

ECO-FRIENDLY ELECTRIC HEATING

We develop safe, reliable and clean electric heating products that respect the environment that surrounds us.

All our products comply with the most demanding manufacturing regulations and meet all the required safety, quality and ecological directives.

Our own quality controls plus those of external companies, provides maximum safety, reliability and efficiency of each of our products. This distinguishes us from competitors and ensures we exceed customer expectations.

All Rointe heating products are manufactured in compliance with the ECODESIGN regulations.

They meet, and in some cases exceed, the minimum required standards, providing a quality product that is fully **Lot20** compliant.

Our products:

- Do not burn harmful fossil fuels.
- Do not emit polluting gases.
- Do not contain heavy metals such as lead or mercury.
- Use high heat transfer mineral thermal fluids.

For more information, go to:
www.ecodesignheating.com

All Rointe technologies and products have been tested and certified in independent laboratories (CEIS and CETENMA). Test reports are available on request.

WHAT MAKES OUR RADIATORS UNIQUE?

MATERIALS

High-purity aluminium alloy

With a thermal conductivity of $209\text{W}/(\text{m}\cdot\text{k})$, our aluminium ensures better product performance and faster heating times. It has the **best price/ conductivity ratio** on the market, is lightweight and durable.

Thermal fluid

The fluid used in our radiators is specially formulated to provide maximum heat transfer that is more environmentally friendly. Its high thermal stability, means a **lower risk of corrosion whilst maintaining thermal conductivity and comfort.**

Heating element with 110 W per element

The heating element is an electrical steel resistor with a balance between watts and number of elements to ensure the most adjusted consumption. A controlled watt per element design guarantees a **lower contact temperature.**

Natural convection reaches up to 5 metres away and 2.7 metres in height.

Ambient temperature stability

Designed to offer maximum comfort, our radiators utilise natural air convection. They have a unique design, where cold air enters the bottom of the radiator and raises its temperature by passing through the interior of the element, expelling at the top as warm air. This allows a constant room temperature with a **small variation of only $\pm 0.25\text{ }^\circ\text{C}$.**

SAVINGS

Our aim is to provide the most efficient electric heating solutions to help our customers to reduce energy costs. That's why our radiators include a variety of energy-saving functions to lower energy consumption without affecting comfort:

Open Windows

This function activates Eco mode if it detects a 4°C decrease in temperature over a period of 30 minutes. This avoids excessive consumption in case a window is left open.

Consumption meter

D Series & Belize radiators include a consumption meter that shows the consumption of your products via the Rointe apps, so you can manage costs easily.

User mode

This mode sets an operating temperature range that is password protected. It restricts selectable temperatures to avoid energy waste.

Accurate sizing

Independent laboratories have demonstrated that, under normal conditions, our radiators only use 38% of their nominal power. This is achieved by sizing our radiators properly with respect to the m² and the climatic zone of the property. By sizing our radiators correctly, we ensure maximum efficiency without excessive consumption.

SAFETY

Up to 20 years guarantee

Our radiators include up to 20 years guarantee on the body and up to 3 years guarantee on electronics, depending on the model and if it's registered online. They also comply with all national regulations for electric heating and are Lot20 compliant.

43°C surface temperature

Due to the balance between heating elements, thermal fluid and aluminium, the surface temperature of our radiators, once it reaches the steady working rate, does not exceed 43°C. Heat is then distributed evenly throughout the radiator surface.

Rointe radiator

Storage heater

Other radiators

In other products, temperature gradients occur between different parts of the product, causing a variability in the surface temperature with the consequent risk of burns.

DIRECT WIFI CONNECTION

Unlike other similar heating systems, Rointe WiFi heating products do not need gateways to manage them remotely from your smartphone.

Each product connects directly with the Rointe Connect App using any 2.4 GHz WiFi network. Provided by the E-life technology communication protocol, it means the user can keep their heating perfectly programmed without the worry of losing connections to each product. With the fastest responding system on the market and real-time synchronisation, any change made will update instantly in your product.

- Easy to install
- No gateways needed
- Secure connection
- Low failure risk

E-LIFE - ADVANCED TECHNOLOGY WITHOUT GATEWAYS

Remote control using the Rointe Connect app

From any smartphone, tablet or computer at any time or place, the user can use the Rointe Connect App to control all features of their WiFi connected heating system.

Secure, domestic and integrated WiFi

When the user makes a change, the data is securely sent via WiFi through the E-Life servers to all Rointe connected heating products in an installation.

Rointe WiFi connected heating systems

All products are instantly updated with any changes made, so when the user returns home they can enjoy a warm welcome from the temperature that has been set.

NEW CONTROL APPS COMPARISON

This season, Rointe introduces a brand new smartphone application to control a new range of products: Belize. This exciting new product is an **affordable, high-quality radiator, controlled by an app with advanced functionality called Rointe Lite**. See below for the main differences between the Rointe Connect Lite apps:

NEW CONTROL PANELS

DIFFERENT CONTROL PANELS FOR DIFFERENT NEEDS

The new Rointe bespoke towel rail range allows you to mix and match the design and control panels for a tailored bathroom heating solution to suit you.

The different designs combine functionality with aesthetics and will fit seamlessly into any décor.

The 3 new control panels provide differing levels of control for greater flexibility over your heating. Choose from the simple ON/OFF only with the PRO or have 24/7 programming with the DIGITAL panel.

Our new towel rails are a convenient, smart heating solution. Choosing the perfect one for your home is dependent on your personal preference and the number of features you would like.

PRO

Simple ON/OFF switch for basic control

- Simple ON/OFF switch
- Operation indicator light
- Class I protection
- IP54 protection grade
- Manufactured according to CE standards
- 2 years guarantee
- Available colours: white & silver grey

H - HEIGHT (mm)	L - WIDTH (mm)	D - DEPTH (mm)

ON PRODUCT

THERMOSTATIC VALVE

This accessory is installed at the hot water outlet of the heater and allows mixing with cold water from the supply network. The resulting mixed water is transported at a lower temperature, achieving energy-savings and minimising heat losses through the pipeline.

TRADE PRICE	£ 88

The thermostatic valve increases the volume of hot water available compared to the capacity of the tank (defined as the equivalent volume).

The equivalent volume represents the litres of water available at 39°C, assuming the water inlet temperature is 15°C and the set temperature is 73°C.

MILOS

W150

Double-conductor heating mat
for installation with hard floors

CHARACTERISTICS

- For ceramic / tiled flooring
- Easy to install, no need to raise floor levels
- Heat from natural convection & radiation
- Resistant and flexible mesh
- Space-saving alternative to other heating
- Cable & mesh: 10 years guarantee

Cable without mesh also available for mat free installation. Contact us to discuss.

DO'S & DON'T'S

MILOS INSTALLATION PROCESS

Rointe underfloor heating systems have been designed so that installation is quick and easy, but as with all electrical systems, certain procedures must be followed. It is important to ensure that you have the correct heating mat(s) for the area you wish to heat and thoroughly read these recommendations about installation.

The installation of these underfloor heating systems is only recommended under ceramic, quarry or natural stone tiles. The maximum thermal resistance of the installed floor must not exceed $0.15 \text{ [m}^2\text{K / W]}$.

It is also possible (but not recommended) to install the heating element under floor finishes such as wood or vinyl by applying a self levelling compound over the heating mat. You must ensure that all heating cables are completely covered with a minimum of 10 mm self levelling compound. It is important that the levelling compound is suitable for use with underfloor heating.

Note that delicate floor finishes such as wood or vinyl have a maximum floor surface temperature of 27°C . This temperature must NOT be exceeded.

DO

- ✔ Read the installation manual carefully before starting. Consult our helpline or a competent professional if you are unsure how to proceed.
- ✔ Ensure the system is tested before, during and after installation.
- ✔ Plan your mat layout and installation so that any drilling after tiling (e.g. for sanitary ware) will not damage the wiring.
- ✔ Maintain a minimum gap of 50mm between wire runs and from conductive parts such as water pipes.
- ✔ Check that the mat is working, immediately before commencing tiling.
- ✔ Take particular care when tiling not to dislodge or damage the heating wire. Ensure that during the course of the installation that no damage is caused by, for example, falling objects, sharp objects etc.
- ✔ Wear gloves to prevent irritation from the fibreglass mesh.
- ✔ Ensure the end cap and manufactured joint are under a full bed adhesive or levelling compound and covered with a tile.
- ✔ Ensure that a heat loss calculation has been carried out and heating requirements have been met if you are using the underfloor system as a primary source of heating.
- ✔ Ensure that the heating mats are separated from other heat sources such as luminaires and chimneys.
- ✔ Ensure that the maximum thermal resistance of the floor does not exceed 0.15 [m²K / W].
- ✔ Ensure that the control card at the back of the manual is completed and fixed at the main consumer unit along with any plans and electrical test records.
- ✔ Contact us on 0203 321 5929 if you are unsure, have any questions or need help and advice.

DON'T

- ✘ Cut or shorten the heating element at any time.
- ✘ Commence installation on a concrete floor that has not been fully cured.
- ✘ Leave surplus matting rolled up under units or fixtures - USE THE CORRECT SIZE MAT.
- ✘ Install the mat on irregular surfaces such as stairs or up walls.
- ✘ Use staples to secure the the heating element to the subfloor.
- ✘ Run the floor sensor wire or power lead over or under the heating element or close to other heat sources such as hot water pipes.
- ✘ Connect two mats in series, only connect mats in parallel.
- ✘ Commence tiling before testing the mat.
- ✘ Switch on the installed mat until 8 days after fitting to allow the tile adhesive to dry completely.
- ✘ Install the mat in temperatures less than 5°C.
- ✘ Bend the heating cable under 25 mm radius.
- ✘ Use the heating system to dry out levelling compound or adhesive.
- ✘ Tape over the end cap or manufactured joint.
- ✘ Attempt a DIY repair if you damage the heating mat.
- ✘ Do not proceed if you are not sure. Please call us on 0203 321 5929.

ERKO

W140

Double-conductor aluminium foil heating mat
for installation with soft floors

CHARACTERISTICS

- For laminate, vinyl, linoleum and carpet floors
- Aluminium foil system
- Easy installation, no need to raise floor levels
- No need for connectors between mats
- Cable & mesh: 10 years guarantee

COMPLETE YOUR INSTALLATION

Thermostats from page 140. Insulation solutions for correct installation on page 144.

DIAGRAMS

- 1 Floor
- 2 Foil heating mat
- 3 Protection & Insulation system
- 4 Subfloor

ERKO INSTALLATION PROCESS

The Erko underfloor heating system **MUST NOT** be installed in thin set cement or in direct contact with a cement or concrete subfloor. The heater **MUST** be installed on top of a suitable soft insulation material. This prevents the heater from being damaged when the weight of the floor, furniture and people are added. The insulation material should be at least 6 mm thick and suitable for use with electric underfloor heating. It is important that you take into account the insulation properties, the better the R value, the shorter the heat up time. If using an insulation board or similar, a soft underlay must be used to ensure the heater is not in contact with the cement facing of the board.

Please ensure that the laminate flooring is suitable for use with electric underfloor heating.

Most wood / laminate floors are compatible with the foil mats but we do not recommend using any wood flooring thicker than 18 mm. Wood flooring with metallic strips as part of their locking systems are **NOT** compatible as these metallic strips may damage the foil mats.

Any wood floor with a pad already attached must not be used with the foil mats. For wooden floors or similar the thermal resistance should not exceed 0.15 [$\text{m}^2\text{K} / \text{W}$].

DO

- ✔ Check with the manufacturer of the flooring that their products are compatible with electric underfloor heating systems.
- ✔ Operate the heating foil with a thermostat in floor sensor mode, to ensure the floor does not exceed the maximum temperature of the wood laminate (usually 27°C).
- ✔ Connect all earth leads to the earth ring.
- ✔ Connect all cold wire leads from the foil mats in parallel inside an electrical junction box.
- ✔ Zone each room with a foil heating system with its own thermostat controller. This allows each room to be controlled individually and save energy. Each thermostat has a maximum capacity of 16 A.
- ✔ Ensure that no sharp edges (e.g. metal edged laminate locking systems) come in contact with the heating foil.
- ✔ Install a soft insulation below the foil mats to prevent damage when the weight of the floor and furniture is added. Make sure unavoidable wooden floor movements will not harm the foil mats.
- ✔ Ensure that a heat loss calculation has been carried out and heating requirements have been met if you are installing the system as a primary source of heating.
- ✔ Ensure that the systems are protected by a 30 mA RCD.
- ✔ Complete the control card at the end of the manual and fix it to the main consumer unit along with any plans and electrical test records, as per the current regulations.
- ✔ Use the foil strips provided to bridge any gaps when cutting and turning the foil mats, to keep earth intact.
- ✔ Contact us on 0203 321 5929 if you are unsure, have any questions or need help and advice.

DON'T

- ✘ Use the foil heating mats with glued locking systems or laminates that have an underpad or cushion material pre-attached to its underside.
- ✘ Install the foil heater up steps, over floors that are uneven or have traces of moisture, carpets or parquet floor or anywhere else except inside buildings.
- ✘ Leave insulating materials such as bean bags, linen or towels on the floor surface.
- ✘ Overlap, fold or wrinkle the foil heating mats or walk unnecessarily over the mats.
- ✘ Place heavy / sharp tools (or any other potentially damaging object) on top of the foils.
- ✘ Install foil heating mats in room temperatures less than 5°C.
- ✘ Install foil mats under walls or partitions, or in areas under heavy cabinets, closets, or fixtures (toilets, sinks, tubs, etc.).
- ✘ Install foil mats within approximately 50 mm of any heat conductive building part, such as cold water pipes.
- ✘ Install foil mats within 20 mm of one another, 50 mm of any wall or 100 mm of a fireplace or hot water pipe.
- ✘ Install foil heating mats under any floor covering other than wood or laminate or wooden floors thicker than 18 mm.
- ✘ Place items on the floor surface which will stop the air flow or not allow heat to rise into the room.
- ✘ Install electrical cables or pipes under the floor with the foil heating mats.
- ✘ Install the heating foils in direct contact with a cement or concrete slab.
- ✘ Do not proceed if you are not sure. Please call us on 0203 321 5929.

ST.0 THERMOSTAT

NEW PRODUCT

Analogue thermostat

compatible with all Rointe underfloor heating systems

CHARACTERISTICS

- ON / OFF button
- Temperature selector
- Operation light indicator
- Compatible with 6.8, 10, 12, 15, 33 and 47 K Ω probes
- Product: 2 years guarantee

TECHNICAL INFORMATION	
Supply voltage	220-240v
Maximum permissible power	3,600 W
Floor probe NTC 10K Ω AT 25°C (3 m)	✓
Ambient temperature probe (integrated)	✓
REGULATIONS & GUARANTEES	
Guarantee on product	2 years

SIZING & SERVICES

PRICE LIST & TERMS OF SALE

RADIATOR SIZING

The success of our products is due to correct sizing, which forms the basis for increased savings. **It's important to size your Rointe product correctly.** That's why we've developed the Rointe Thermal Coefficient. It calculates the number of elements necessary for a property, based upon the square metres and geographical climate.

By using this calculation, we can determine the appropriate sizing for the most balanced consumption:

$$\frac{\text{CLIMATIC ZONE COEFFICIENT}}{\text{HEATING ELEMENT PERFORMANCE COEFFICIENT}} = \text{R.T.C.}$$

To calculate the required electric radiators, we need to distinguish between m^2 and m^3 . For ceilings with a height lower than 3 metres, we use the R.T.C. (m^2). For ceilings with a height higher than 3 metres, we use the R.T.C. (m^3).

R.T.C. \otimes m^2 \ominus NECESSARY ELEMENTS

R.T.C. \otimes m^3 \ominus NECESSARY ELEMENTS

Calculation m^2 - ceiling height less than 3 metres

Calculation m^3 - ceiling height more than 3 metres

Reference table for standard height radiators

Climate	MILD	COLD	VERY COLD	EXTRA COLD	MILD	COLD	VERY COLD	EXTRA COLD
Kcal / h m^2	436 BTU/h m^2	476 BTU/h m^2	516 BTU/h m^2	556 BTU/h m^2	139 BTU/h m^3	159 BTU/h m^3	179 BTU/h m^3	198 BTU/h m^3

CONSUMPTION CALCULATION

Example in m ²	Example in m ³
Room of 16m ²	Room of 16m ² x 3.5 m height = 56 m ³
Cold Climate Zone (0.8 el/m ²)	Cold Climate Zone (0.26 el/m ³)
16 m² x 0.8 el/m² = 12.8	56 m³ x 0.26 el/m³ = 14.5
13 elements	15 elements

Cost & consumption calculation

NOMINAL POWER 1,430 W	EQ. CONSUMPTION COEFF. 38%	EFFECTIVE POWER 0.54 kW			
EFFECTIVE POWER 0.54 kW	HEATING TIME 12 h	RATE (£/kWh) £ 0.14 / kWh	DAILY COST £ 0.90	MONTHLY COST £ 27.21	

With one D Series radiator, to maintain a stable temperature of 21°C for 12 hours, we only need an **equivalent consumption of 38% of its nominal power.**

Example for a home

Using the parameters and coefficients, we've provided an estimated calculation of an 80 m² home in a cold climatic zone with D Series radiators, programmed for 12 hours a day with a set temperature of 21°C.

ROOM	M ²	R.T.C.	N° OF ELEMENTS	PRODUCT	NOMINAL POWER	EQ. COEFF. CONSUMPTION	EFFECTIVE POWER

Comparison between Rointe D Series and other heating products

Here we show you a comparison between the Rointe D Series radiator and other different heating products available on the market. Product data is presented on the basis of technical characteristics, functionalities and results obtained after performance testing. The tests have been carried out at the Rointe laboratory, under the same fair conditions.

Programmable panel heater vs Rointe D Series

PROGRAMMABLE PANEL HEATER	
Installed nominal power (area 65 m ²)	6 kW
Daily consumption ¹	36 kWh
Hours of heating per day	12 h
Tariff ²	0.1653 £/kWh
Daily cost	£ 6.02
Monthly cost ³	£ 180.67
Annual cost ⁴	£ 1,084.00

D SERIES RADIATOR	
Installed nominal power (area 65 m ²)	5 kW
Daily consumption ¹	26 kWh
Hours of heating per day	12 h
Tariff ²	0.1653 £/kWh
Daily cost	£ 4.32
Monthly cost ³	£ 129.73
Annual cost ⁴	£ 778.36

28%
savings

¹ Test conducted over a 24-hour cycle in the Rointe Laboratory using a dual climate chamber with average heat loss conditions. Each model was programmed to maintain a comfort temperature of 21°C for 12 hours a day during the full cycle (4 hours in the morning and 8 hours in the afternoon). Each model was sized according to manufacturer recommendations for a 10 m² room. ² British Gas Plans: HomeEnergy Secure Green (Economy 7) & HomeEnergy Fixed (unit rate). Standing charge not applied. ³ Monthly cost equates to 30 days per month. ⁴ Annual cost equates to 6 months per year.

Digital storage heater vs Rointe D Series

19%
savings

DIGITAL STORAGE HEATER

Installed nominal power (area 65 m ²)	9 kW
Daily consumption ¹	42 kWh
Hours of heating per day	12 h
Tariff ²	Day 0.227 £/kWh
	Night 0.093 £/kWh

Daily cost	£ 5.37
Monthly cost ³	£ 161.07
Annual cost ⁴	£ 966.41

D SERIES RADIATOR

Installed nominal power (area 65 m ²)	5 kW
Daily consumption ¹	26 kWh
Hours of heating per day	12 h
Tariff ²	0.1653 £/kWh

Daily cost	£ 4.32
Monthly cost ³	£ 129.73
Annual cost ⁴	£ 778.36

Surface temperature comparison

The surface temperature of our radiators, once it reaches steady working rate, does not exceed 43°C. Heat is then distributed evenly throughout the radiator surface.

In other products, temperature gradients occur between different parts of the product causing a variability in the surface temperature with the consequent risk of burns.

	Surface temperature
Rointe D Series	42.7 °C
Panel heater	81.2 °C
Oil filled radiator	58.4 °C
Storage heater	70.2 °C

PROJECT & TECHNICAL STUDIES

We know how important it is to choose the right heating product for your project.

That's why our dedicated team offers expert heating advice, free technical studies and a 360° service for successful installation in any project. They are on hand to guide you towards the right heating system and carry out careful monitoring to ensure all work meets the quality and service our brand demands.

We provide a free personalised Technical Study to help you choose which Rointe heating system is right for you.

Rointe 360° Service

We provide you with a complete technical heat loss study to determine the correct heating solution and sizes required for your needs. Ideally, we need your CAD plan or drawing.

We offer, free of charge:

Custom Technical studies

- Correct installation sizing
- Personalised quotes & calculation of heating needs

Consumption and comparative studies

- Analysis of consumption costs
- Comparative consumption with other systems

Installation planning

- Heating & domestic hot water installation
- Installation and layout for underfloor

After sales

- Monitoring of process and installation
- Dedicated team for after-sales support

BUILDING INFORMATION MODELING (BIM)

Improve the heating system installation of your project with Rointe BIM files.

BIM is an intelligent 3D model-based process that gives construction professionals the tools to more efficiently plan, design, construct and manage buildings and infrastructure. BIM helps to place Rointe heating products in the construction design and build map. We can present full technical details of our products to key project clients.

So you can save even more time, you can now download Rointe product BIM files from [bimstore](#).

CPD: enhanced learning for professionals

With over 30 years' experience in the heating industry, our CPD material helps you achieve accredited hours whilst giving useful, relevant and up-to-date information.

We want you to understand the issues, innovations and regulations surrounding the electric heating industry, which will ultimately improve the properties and communities you design and create. Our aim is to deliver educational CPD to HVAC & construction professionals.

To arrange a session or find out more information, please contact cpd@rointe.com.

SEMINARS

- Design innovation in electric radiators
- Electric heating: an advanced alternative

PRODUCT TRAINING

- For HVAC & Construction professionals (installers, contractors, specifiers, electricians, architects etc.)

FACTORY TOUR

- Manufacturing processes & laboratory
- Newly designed showroom
- CPD seminar & Q/A session

FREQUENTLY ASKED QUESTIONS

INSTALLATION
HOW TO VIDEO

RADIATORS

FAQS: RADIATORS

Can I alter the plug on my Rointe product?

No modifications can be made to any part of a Rointe heating product unless authorised by Rointe. This includes altering or cutting the plug unless a qualified electrician needs to hard wire your product. Your guarantee will be invalid if the product has been manipulated, modified and/or repaired in any way by unqualified persons.

Do Rointe radiators have low surface temperatures?

Yes, but only once the steady working rate has been achieved, which is then distributed evenly throughout the product surface.

How do I clean my Rointe radiator?

We recommend that all parts are kept clean (behind, underneath, along the fins), by using a damp cloth and pH-neutral soap. Only clean the control panel with a dry cloth. Do not use any abrasive material or chemicals on the product and switch the product off before cleaning.

Can I install a radiator behind furniture?

Rointe recommends leaving a space of at least 50 cm free of furniture and belongings around your radiators to facilitate natural air convection. Rointe radiators should also be installed at least 10 cm from the floor.

WATER HEATING

FAQS: WATER HEATING

What do you mean by DHW?

Domestic hot water or DHW is the term coined for heated water intended for human use. The most common are baths, showers or sinks but it's also used for cleaning and household appliances like washing machines and dishwashers.

What size water heater should I get?

As different households have many different needs depending on the number of users and type of use, it's best for you to contact us to determine what size water heater you need.

What's the difference between vented and unvented?

Unvented water heaters heat water directly from the mains water supply. This means they benefit from higher pressure/flow rates and more balanced hot/cold water supplies and can be installed practically anywhere. They're the ideal water heating system for properties with multiple outlets, like kitchens and bathrooms. Rointe Rome, Siena & Geneva are all unvented models.

Vented water heaters are generally installed over the sink area. They have an open outlet, so rely on a tap or valve opening on the inlet side to displace the hot water stored in the heater.

TOWEL RAILS

INSTALLATION
HOW TO VIDEO

FAQS: TOWEL RAILS

Can I install a towel rail next to the shower or bath?

No, for safety reasons you should leave a distance of at least 60 cm from any wet area in the bathroom.

Why do the chrome and white finishes have different powers?

The chrome metal of the towel dryer conducts heat more efficiently and therefore heats up more than the white.

What size towel rail should I buy?

Check out our table opposite.

TOWEL RAIL SIZING TABLE

FINISH	POWER	AREA
WHITE	300 W	Up to 3 m ²
	500 W	4 - 5 m ²
	750 W	6 - 7 m ²
	1,000 W	8 - 10 m ²
CHROME	300 W	Up to 2 m ²
	300 W	3 - 4 m ²
	500 W	5 - 6 m ²
	750 W	7 - 8 m ²

UNDERFLOOR

FAQS: UNDERFLOOR

Can I cut the cable of the underfloor mat?

No, you must never cut the radiating cable of our underfloor heating mat/mesh, since this action leads to the disablement of the product, which will never work again.

How do I install the insulation blanket for ERKO?

The correct installation of the insulation blanket for the ERKO underfloor heating system is with the aluminium film facing downwards and the PE facing upwards.

Is it compulsory to install the floor probe?

Whenever you carry out the installation of a radiant floor system, you must install the floor probe supplied with the thermostat to read the real temperature of the floor.

How far from the wall should I install the mesh?

We must maintain a safety distance of 10 cm from the walls when installing any radiant mesh to avoid heat loss. Also you should not install underfloor in room temperatures less than 5°C.

ROINTE CLUB FOR INSTALLERS

Discover all the benefits of becoming a Rointe Trusted Installer...

We're proud to work with an extensive network of trusted and professional installers across the nation. The Rointe Club offers special advantages designed exclusively for all our installers. You'll have access to training courses, free technical studies, merchandise and our gift card incentive scheme. Plus we'll list your business on our online directory help you grow.

It's really easy to sign up, just give us a call on 0203 321 5928 to speak to our Sales team. They'll organise free training for you to earn Trusted Installer status, along with freebies to welcome you. You can also sign up online at: <https://rointe.com/uk/professionals/register-rointe-club/>.

Join the Rointe Club now for exclusive advantages and freebies that will benefit your business.

EXTENDED GUARANTEES

We give increased guarantees from 2 to 6 years on the electronic components of the products you install.

EXCLUSIVE TECHNICAL TRAINING

We offer expert technical training, courses and seminars, completely free of charge, to all our Trusted Installers.

PRIME WEBSITE LOCATION

As a Trusted Installer, we will add your company details to our directory on:

www.rointe.com/uk/

FREE OF CHARGE DESIGN SERVICE

We offer our marketing expertise with help designing and producing POS material specific to your brand/company.

TECHNICAL STUDIES AND VISITS

We offer Trusted Installers free Technical Studies, site visits, presentations and advice from our trusted Sales Managers. There's also a team of Account Managers and Technical Support if you need help.

3% GIFT CARD SCHEME

Accumulate 3% of the net amount of all your Rointe purchases in gift cards, up to a maximum of £500. This excludes website purchases. At the end of the year you can choose an e-gift card from hundreds of outlets: Amazon, Argos, Asda, Costa Coffee, Marks & Spencer, Nando's...

3%

GIFT CARD SCHEME

POS MATERIALS & PROMOTIONS

We give you free of charge stickers for vehicles, vans and windows, and freebies like tape measures, hats, hoodies and Rointe jackets.

TERMS OF SALE

1. DEFINITIONS

"Company" means ROINTE UK.

"Customer" means any person or organisation to whom the Company shall provide or contract to provide Goods.

"Goods" means goods sold by the Company to the Customer and including but not limited to those goods for which payment in full has not been received by the Company.

"Contract" means the Contract between the Company and the Customer for the sale of Goods.

2. GENERAL APPLICATION

2.1. These conditions apply to all Goods supplied by the Company to the Customer and no alteration or qualification of these conditions shall be effective unless agreed by the Company in writing. No order shall be binding on the Company until accepted by the Company in writing.

2.2. The Customer who orders Goods from the Company shall be deemed to agree that any written or printed conditions attached to or referred to in such orders are only binding so far as they are not at variance with the Company's Terms and Conditions.

2.3. The Customer acknowledges these Terms and Conditions of sale having checked them in advanced and accepting them in full.

3. PRICE AND PAYMENT

3.1. All Goods must be paid for at the time of ordering unless the Company has agreed to supply on credit terms in which case the following conditions apply:

- a. Payment shall be due as per the invoice.
- b. Payment shall be made in full without deduction or set off.
- c. The Customer shall indemnify the Company in respect of all costs incurred by the Company in recovery of the price from the Customer.
- d. Payment may not be delayed under any circumstances.

3.2. Prices are subject to revision without notice and the prices payable by the Customer will be those in effect at the date of order.

3.3. Prices quoted in current price lists of the Company supersede all prices for similar goods in previous price lists.

3.4. Prices quoted are exclusive of V.A.T. which shall be charged at the rate applicable at the time.

4. CANCELLATION

4.1. No cancellation of any order from the Customer can be accepted without prior written agreement from the Company. If the Company provides written agreement to the cancellation any and all costs and expenses incurred by the Company will be paid by the Customer.

4.2. No cancellation of orders will be accepted under the following circumstances:

- a. If the order has been dispatched.
- b. If the order contains special units whose manufacturing has begun.

5. CUSTOMER RETURNS IN GOOD CONDITION

5.1. No customer returns can be accepted without prior written agreement from Rointe.

5.2. A handling charge of at least 15% of the original cost price will be payable to cover receipt, inspection and fault registration costs.

5.3. All carriage charges relating to returns made to Rointe are at the customers cost.

5.4. Any non-faulty product returned by the customer will only be accepted under the following conditions:

- a. Goods returned for credit in less than 30 days from date of purchase will incur a 15% handling charge.
- b. Goods returned for credit between 30 days and 3 months from date of purchase will incur a 20% handling charge.
- c. Goods returned for credit between 3 months and 12 months from date of purchase will incur a 25% handling charge.
- d. Goods returned for credit that were purchased over 12 months will incur a 30% handling charge.

6. DELIVERY

6.1. All times or dates given for the delivery of the Goods are approximate only and the Company shall not be liable for any delay in delivery of the goods howsoever caused.

6.2. The Company shall be entitled to delay or cancel delivery or to reduce the amount delivered if it is prevented from or delayed in manufacturing, obtaining or delivering the Goods through any circumstances beyond its control including but not limited to strikes, lockouts, accidents, war, fire, reduction in or unavailability of power at manufacturing plant, breakdown of plant or machinery or shortage of or unavailability of raw materials from normal sources of supply.

6.3. Minimum carriage paid: £1,000 net (excluding VAT). For less than this total amount there is a £30 carriage fee.

6.4. Next day orders will be £30. Next day delivery before 12.00 noon. is £40. Next day delivery before 10.00 a.m. is £50. Delivery for Saturday a.m. is £60. Spares, remote controls and grills are £5.

6.5. The Company reserves the right not to supply if the Customer has outstanding invoices and the payment is overdue. The customer in this case will be on stop.

7. DELIVERY CONDITIONS

7.1. The products are supplied packaged with brackets, screws and fixings the cost of which is included in the sale price. The goods are deemed to be delivered when they are placed on the lorry in the warehouses, except for offers with special conditions, and the Company's liability as a haulier ends at that point.

7.2. Confirmed orders may be supplied in partial deliveries. The Customer should check the goods and write "received pending checking" next to the signature in the haulier's delivery note.

8. GUARANTEE

8.1. All materials are covered by the respective guarantees for any manufacturing fault from the date of sale and acceptance of the fault by our Technical team will be required before the faulty product is returned to us. Please refer to the product manuals for details.

9. DEBIT NOTES

9.1. The Company reserves the right not to accept debit notes received by the Customer.

9.2. No debit note from the Customer can be accepted without prior written agreement of the Company and the Company provides written agreement to process the debit note accordingly.

10. RISK AND TITLE

10.1. Risk in respect of any Goods connected with the Contract shall pass to the Customer at the time of delivery by the Company.

10.2. Title to the Goods shall not pass to the Customer until the Customer has paid the total price to the Company.

10.3. The Customer is not the agent of the Company for the purposes of any sale of the Goods and for the avoidance of doubt it is hereby declared that on no account has the Customer or its receiver or liquidator or trustee in bankruptcy any authority to sell the Goods when in receivership liquidation or bankruptcy or when the same is about to occur.

11. EXCLUSION OF LIABILITY

11.1. Except in respect of death or personal injury caused by the negligence of the Company or its agents, officials or employees (being negligence defined by Section 1 of the Unfair Contract Terms Act 1977) the Company shall not be liable to the Customer by reason of any representation implied guarantee condition or other term or any duty at common law or under any contract or for any economic loss, loss of production, loss of bargain, loss of profit or any other costs expenses or other claims for consequential compensation whatsoever which arise out of or in connection with the Contract except as expressly provided in these conditions and PROVIDED ALWAYS that the maximum liability of the Company in relation to any loss or damage shall in no case exceed the price in the Contract.

12. REPRESENTATIONS

12.1. The Company's employees or agents are not authorized to make any representations concerning the Goods unless confirmed by the Company in writing.

13. SHORTAGES

13.1. Shortages should be identified at the time of delivery and noted on the face of proof of delivery document which should be signed by the Customer indicating acceptance of the delivery as specified or amended.

13.2. Failure to note alleged shortages at the time of delivery shall prevent the Customer from claiming under the Contract.

13.3. Customer cannot claim compensation under any circumstances.

14. BRITISH STANDARD

14.1. The Goods shall be supplied by the Company in accordance with the relevant standard applying to such Goods.

15. GUARANTEE

15.1. Where any Goods (or any part thereof) are shown to the reasonable satisfaction of the Company to be defective by reason of faulty material or workmanship within a period of twelve months from the date of installation in respect of domestic heaters or water heaters or twelve months from the date of delivery in the case of Goods supplied for use in homes or professional areas the Company shall at its sole option:

a. Deliver replacement Goods or any part or parts thereof free of charge.

b. The liability of the Company under these terms and conditions shall be accepted by the Customer in substitution for and to the exclusion of any other claims for direct loss which the Customer has or may have.

c. The Customer should revise the instructions manual and bear in mind the Company recommendations.

16. HEALTH AND SAFETY

16.1. All Goods are supplied by the Company to the Customer with appropriate fitting and other instructions relating to the fitting and installation of Goods. Certain goods are supplied accompanied by written recommendation from the Company that they should only be fitted or installed by expert and skilled workers and it shall be the responsibility of the Customer to ensure that where the Goods are sold on to a third party they are accompanied by all appropriate safety and fitting instructions.

16.2. Where the Customer fits and installs the Goods itself it shall ensure that the contents of all the safety and fitting instructions are specifically drawn to the attention of its employees.

16.3. The Customer hereby undertakes to take such measures as are communicated in writing to the Customer by the Company and to take such other steps which are sufficient to ensure, so far as is reasonably practicable, that the Goods will at all times be safe and without risk to health when properly used. The Goods shall not be regarded as properly used when they are used without regard to any relevant information or advice relating to their use which is communicated to the Customer by the Company.

16.4. The Customer shall indemnify and keep indemnified the Company in respect of all claims, actions, proceedings, costs, expenses, loss or damage (whether direct, indirect, economic or consequential) including without prejudice to the generality hereof any monetary penalty or fine in respect of or in connection with the Goods arising out of any one or more of the following:

a. under the Health and Safety at work Act 1974 as amended or any regulations orders or directions made thereunder.

b. Resulting from any breach of the Customer's obligations under this terms and conditions.

c. Under the Consumer Protection Act 1987 or any statutory

TERMS OF SALE

replacement therefor in respect of Goods which were not defective at the time when they were supplied to the Customer.

17. MAINTENANCE

17.1. Radiator

The radiator does not need any maintenance. We recommend cleaning the entire product (rear, lower radiator, upper fins, etc.). Do not use any abrasive on the aluminum, wipe it with a damp cloth and neutral pH soap and the screen with a dry cloth.

To avoid overheating, do not cover the heating appliance. Do not insert any object inside the air inlet and outlet. Do not operate with wet hands. Do not place items containing water, such as glasses, vases, etc., on the radiator. Do not use insecticides, paints or aerosols on the radiator. Do not sit on the radiator or place anything in front of it.

17.2. Towel rails

The towel rails do not need any maintenance. We recommend cleaning the entire product. Do not use any abrasive product on the steel body, wipe it with a damp cloth and neutral pH soap and screen with a dry cloth.

17.3. Water heaters

The Rointe water heaters do not need any special maintenance, except for an annual review of the magnesium anode. To clean the thermostat simply rub the surface with a soft cloth or damp sponge. Do not use abrasive chemicals or detergent.

The guarantee is valid from the date of purchase. In case of failure of the water heater during this period of guarantee, the complete device will be replaced. To guarantee the duration of the water heater, the user is obliged to inspect the magnesium anode wear annually and ask for its replacement in case of excessive wear.

Our guarantee will be applied with the express condition that the electric thermostat & water heater has been correctly installed with the SAFETY UNIT and the PROTECTIVE CAPS that we supply together with the product.

18. SEVERANCE

18.1. In the event that for any reason any provision or provisions in these conditions or any part thereof is or is held to be void or unenforceable or otherwise invalid any Contract made which incorporates these conditions shall continue to be fully binding and the remainder of these conditions shall continue to be effective.

19. WAIVER

19.1. The rights and remedies of the Company under the Contract shall not be diminished waived or extinguished by the granting of any indulgence, forbearance or extension of time by the Company nor by any failure of or delay by the Company in asserting or exercising any such right or remedy.

20. JURISDICTION

20.1. The conditions in each and every Contract made pursuant hereto here shall be governed by and construed in all respects in accordance with the law in your country and the Company and the Customer irrevocably submits to the exclusive jurisdiction of the courts in your country.

20.2. These general terms of sale will apply to all trade relations between the Company and the Customers, and purchases accept these general conditions when making an order.

NOTE: ROINTE reserves the right to modify the presentation and configuration of the contents included in this publication. The images of the products may not correspond to the final product installed (some images do not reflect the wiring, supports, water intakes and pipes necessary for the product to work correctly).
