

# K SERIES QUICK PROGRAMMING GUIDE

Use **+** or **-** to move to the first hour you wish to program.

Press **⊙** to scroll between the three modes.

For Economy mode the **☾** icon will appear and one dot will flash. ■

For comfort mode the **☀** icon will appear and two dots will flash. ■■

For Anti-frost mode the **❄** icon will appear and the dot will appear to bounce.

For the radiator to be off no icon will appear and the dot will appear to bounce. (See step 4 for how to to select Anti-frost or off as default.) Repeat this process for each hour you wish to program. To finish the programming press **MENU** or leave the radiator for 30 seconds without pressing any buttons.

## 5. Checking the programming

By repeatedly pressing **MENU** you can see the programming that is saved in the radiator for each day. Pressing only once shows day one, twice shows day two and so on.

## V. Other information

Press **+** & **-** together for 3 seconds to lock the keypad. **🔒**

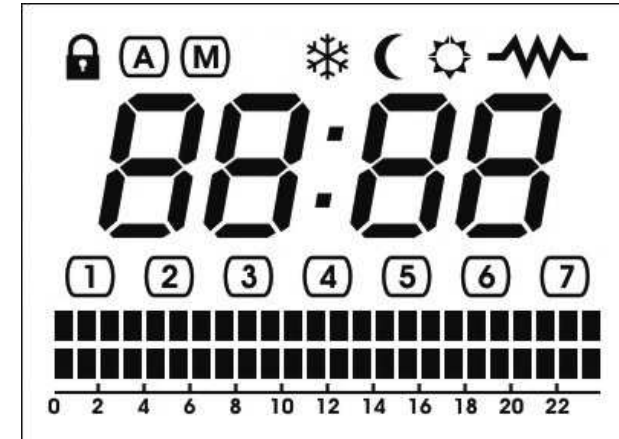

Press **+** & **-** together for 15 seconds to perform a factory reset & clear programming

**⚡** indicates that the radiator is working.

Pressing **MENU** for 3 seconds while in manual mode will take you to the LCDT contrast screen. The letters **LCdT** will appear.

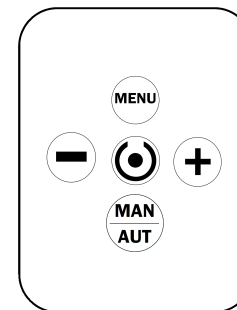

You can increase the contrast by pressing **+** and decrease it by pressing **-**
