

Control your heating ...
anytime, anywhere

With Delta Ultimate, thanks to its Wireless technology and E life technology – developed exclusively for Rointe you can control your heating with your tablet or smartphone easily.

RointeCONNECT

Advanced technology for maximum energy saving.

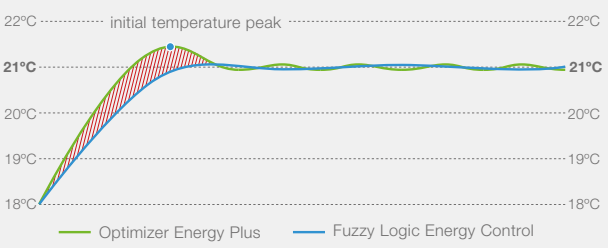

The most advanced heating system ever created by Rointe incorporates in its electronics Fuzzy Logic Energy Control the new low power technology developed by Rointe – this has evolved from its predecessor Optimizer Energy Plus – it has a faster and more effective startup period allowing the initial heating period to be stabilized reducing the equivalent ratio of consumption to 38%.

How does it work?

As we can see in the graph, from startup and throughout the heat rise curve, the Fuzzy Logic Energy Control predicts the quantity of power required in each moment until reaching the temperature established by the user which in this case is 21°C.

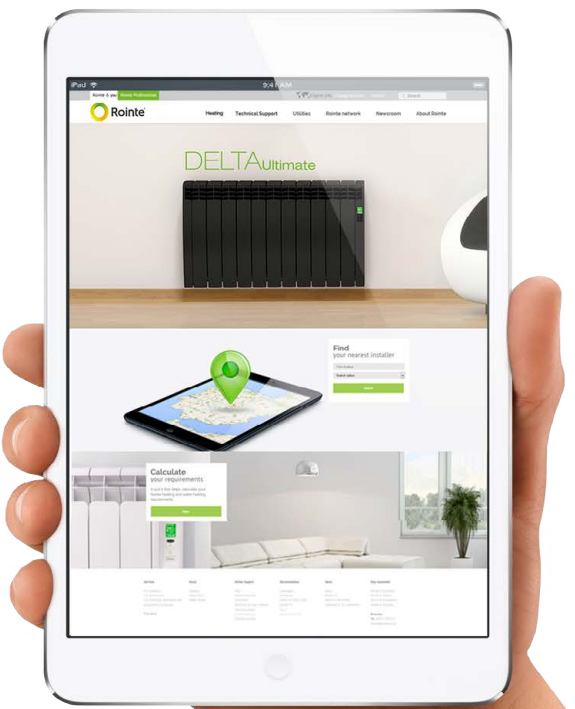

This technology proportionally reduces the electric power necessary to reach the desired temperature by softening the initial curve, reducing the temperature peaks and, thanks to the multiple stop-starts occurring during the stable period that follows, it favours a greater temperature stabilisation.

DELTA Ultimate

Low consumption
digital integral heating

bring colour to your life

Control your heating ...

... anytime, anywhere.

We bring warmth to your home.
www.rointe.co.uk

bring colour to your life

Comfort. Control. Savings.

The new Rointe Delta Ultimate heating system will revolutionize the way you think of the world of electric heating. From its sleek new design with 100% aluminum to its state of the art electronics with built in WI FI it is designed to bring you comfort and savings for your home with unparalleled controllability.

Different colour display screens

DELTA Ultimate radiator

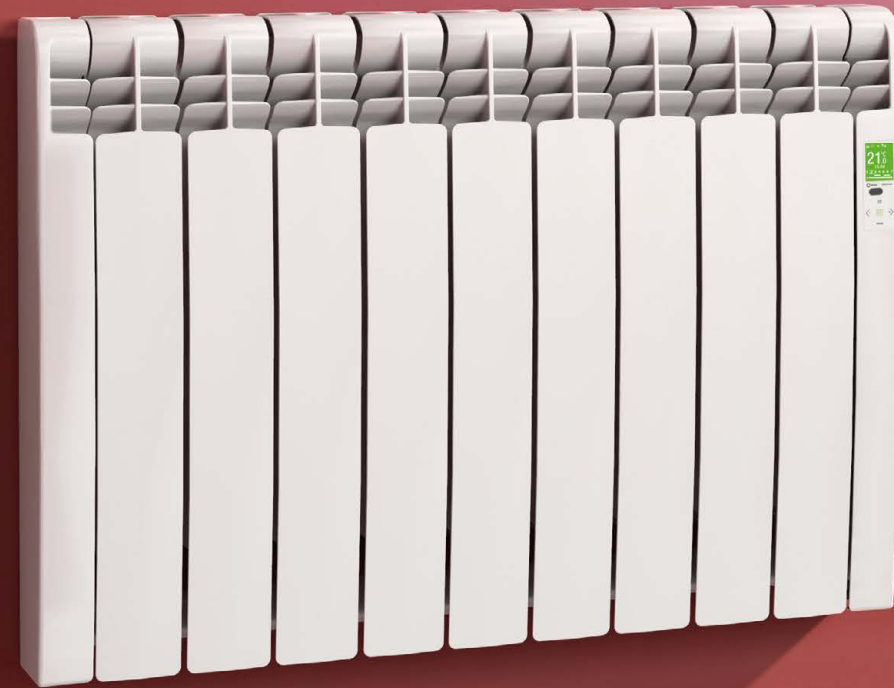

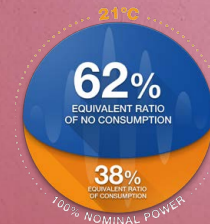

- Low consumption
- Aluminium end panels
- Optimized design for maximum dissipation
- SMD Electronics & Advanced technology
- Optimal balance between W/element
- Open windows function
- Infrared communication
- Keypad programming
- Up to 10 years guarantee
- TFT Screen
- Rointe Eye Detect
- Available in two colours

This radiator has an effective power of only

38%

of its nominal power*

*The effective power is the actual power needed to keep a room of 12 m² at a stable temperature of 21°C, regulated by the unique technology of Fuzzy Logic Energy Control, always under certain parameters and according to the results of the tests performed by Rointe and independent laboratories.

DELTA Ultimate towel rails

Modern & Elegant design

- Curved watertight steel body
- Optimum relationship between heating element and thermal fluid
- SMD Electronics & Advanced technology
- Infrared and Wifi communication
- Infrared communication
- Keypad programming
- 2H boost function
- Available in 3 different finishes
- Up to 10 years guarantee
- Open window function
- E-life Technology
- TFT Screen

Total control in the palm of your hand
